

# Couples Rush To Get New Pill For Memory Loss

Clinical trials show seniors taking active ingredient for 90-days restored 12 years of mental decline

DMS - Top doctors from Stanford University have announced an amazing new solution for memory loss. Now after years of research and testing, doctors are recommending it to their patients – and sales are booming from coast-to-coast.

The developers of this new brain enhancing pill have called it Neuro-DMG™, and there are some very good reasons why seniors are rushing to get their hands on it. To begin with, the clinical results were very impressive. Participants taking Neuro-DMG™ active ingredient saw a 30% boost in brain function. They enjoyed a 44% improvement in memory. Even their ability to learn new tasks was increased by 33%. Neuro-DMG™ active ingredient comes from a natural compound. It is both safe and healthy. Scientists believe it helps regrow new cells in the brain which improve memory, concentration and thinking power.

“In all my years of promoting health and wellness, Neuro-DMG™ is the most exciting solution to come along for sufferers of mental decline,” said Dr. Sandra El Hajj, founder and chief researcher at Global Organization for Preventive Health. “We’ve finally found a pill that can help restore a person’s memory with relative safety and without side effects” she added.

## WHY SO MUCH EXCITEMENT?

Scientists believe they have discovered an amazing brain nutrient to roll back the clock on cognitive decline by up to 12 years. Imagine no longer fearing mental decline, senility, or loss of independence. Imagine a remarkable brain booster that’s safe, natural, and scientifically proven...All yours without a doctor, prescription, or side effects. This natural compound has shown ability to sharpen memory and concentration—but also helps “perk you up” and put you in a better mood. Over 3,000 published research papers and more than 64 clinical studies have established this natural compound to strengthen memory, boost learning and improve concentration. Out of those 64 studies, 17 were double-blind, placebo-controlled studies, which are the “gold standard” of clinical testing. Time after time, results significantly outperformed the placebo in boosting memory and brain power.

“My memory decline has been going on for some time,” says Jack Yates of Vashon, WA. “but Neuro-

**POPULAR PILL:** Doctors are now recommending new (Neuro-DMG™) to seniors suffering from symptoms of memory loss and mental decline.

DMG™ has provided the boost I was looking for. It’s a relief to know I’m no longer forgetting my keys anymore.”

## MEDICAL BREAKTHROUGH

The U.S. clinical trials were conducted by doctors from Stanford University. The studies included men and woman between the ages of 50 and 75 who were suffering from age related memory problems.

They were not instructed to change their diet or exercise habits. They were told only to take Neuro-DMG™ active ingredient for 90-days. The results were stunning. The participants who took the pill as directed saw a 30% increase in brain function. They were able to remember events, people, numbers, names and faces with greater ease and clarity.

Users also showed significant improvements in recalling telephone numbers and the location of misplaced objects. Even their ability to concentrate while reading, talking, and performing tasks was greatly enhanced. Based on these results, the doctors concluded that the participants had, “rolled back 12 years of mental decline.”

The results of these trials were published in the medical journal *Neurology*. Further studies have confirmed these impressive results, with users seeing a 44% improvement in memory power... a 33% increase in learning skills... and a 20% boost in brain wave activity.

## HOW IT WORKS

Neuro-DMG™ is a one-a-day pill that’s taken after breakfast. The pill is small. Easy to swallow. There are no harmful side-effects. The active ingredient in Neuro-DMG™ is a natural compound called phosphatidylserine. Research shows that as we age, the quantity of nerve cells in our brain begin to decline. This is due to stress, unhealthy diet and life-style habits.

The result can be delayed reactions, slower thinking, memory

problem, and eventually a complete breakdown in brain function. Scientists believe Neuro-DMG™ active ingredient works to stimulate the growth of new brain cells in the brains neural network.

The results can be seen quite quickly.

“I had severe memory problems,” said 69 year old David S. of Henderson, NV” But I can already concentrate and remember details better after only one month with Neuro-DMG™. “This pill is easing my fear of dementia,” he added.”

## WHAT DOCTORS ARE SAYING

Top doctors from coast to coast are now recommending Neuro-DMG™ to people suffering from memory loss or symptoms of mental decline. “I’ve never seen a pill that allows doctors to help restore age related memory loss so significantly. Taking Neuro-DMG™ is a life changing event for some seniors,” said Dr. Jacob Moss, an M.D. from Rexburg, ID.

“Many Neuro-DMG™ users notice improved memory, concentration, and thinking ability within just a few days,” said Dr. Hien Pham, an M.D. from New York, NY.

“Neuro-DMG™ is helping thousands of seniors across the country maintain healthy brain function into old age,” said Dr. Eric Wood, an NMD, from Ft Lauderdale, FL.

## HOW TO GET

This is the official release of Neuro-DMG™ in Connecticut. And so, the company is offering a special discount supply to any person who calls within the next 48-hours. A regional order hotline has been setup for local readers to call. This gives everyone an equal chance to try Neuro-DMG. Starting at 7:00am today, the order hotline will be open. All readers have to do is call Toll-Free **1-800-000-0000** and provide the operator with the discount approval code: **XXXX**

The company will take care of the rest.

**Important:** Due to Neuro-DMG™ recent media exposure, phone lines are often busy. If you call and do not immediately get through please be patient and call back. Those not getting through before the 48-hour deadline expires must pay more for Neuro-DMG™.

## Brain Scans Prove It Works

**BEFORE:** “Dead” areas of the brain mean the devastation of memory loss.

**AFTER:** Neuro-DMG™ active ingredient lights up even “dead” brain cells.
